countries
on all continents

Slovenia – headquarters

The company produces more than 4.000 different products. The sales range is divided into two divisions, end products under the Roto brand and industrial components for custom made products.

In Slovenia, we have a central logistics center, from where products are distributed to customers around the world. We have our own transport fleet and provide »just in time delivery« at a distance of up to 500 km. Delivery outside Europe takes place by container transport.

We process over 6 million kg of polymers annually

The company uses five production technologies to manufacture plastic products. Annual company process of over 3 million kg of different polymers. We use more than twenty different materials regarding product characteristics and processing technology.

Production is computercontrolled, automated and robotized,

organised in accordance with the ISO 9001 quality standards and the ISO 14001 environmental standard.

Value is added to products also by assembling different components. The customer thus gets not just a piece of plastic but a comprehensive solution.

Eco friendly products

Production is organized in accordance with the environmental standard ISO 14001. Waste material is 100% RECYCLED and used for the production of less demanding products.

We also produce environmentally friendly products, such as waste water treatment plants, oil and grease separators, rainwater tanks, ...

European pioneer and your reliable partner for innovative solutions with rotomolding technology

We offer technical support to the customer: advice on product selection, assistance with installation, maintenance and servicing, production of 3D sketches, certification.

Social responsibility

Roto is a socially responsible company, as it sponsors many sports and cultural events. We sponsor the activities of associations, federations and successful athletes who also participate in the development of new products and are ambassadors of our company around the world.

We work with high school and university students from the local environment as mentors for diploma, master's and doctoral theses. We provide scholarships to talented individuals and offer them practical education during school and career after completing formal education.
